## COMPLETE SET OF PENDING CLAIMS

1. (Twice Amended) A system for purchasing lottery tickets over the Internet comprising:

at least one server; and

at least one computer connected to the at least one server via [the] an Internet purchaser entering predefined information into said server via said computer;

wherein said at least one server automatically forms at least one virtual group of lottery ticket purchasers based on the predefined information entered by the purchasers, which sets the purchasers for the group, the at least one server storing group information for the at least one virtual group which includes entered choices for the predefined information;

wherein the at least one server stores lottery information about at least one lottery;

wherein the at least one server causes the lottery tickets to be purchased for the purchasers according to the group information and the lottery information; and

wherein the at least one server communicates results of the purchase of lottery tickets to the purchasers on the basis of the group information.

2. The system of claim 1 wherein the group information comprises one or more of the number of purchasers, telephone numbers, fax numbers, cellular telephone numbers, e-mail addresses and biographical information of the purchasers.

3. The system of claim 1 wherein the lottery information comprises one or more of the lottery type, purchase volume, purchase interval, lottery number selection, tracking interval, payment method, distribution and notification method for the virtual group.

4. The system of claim 1 further comprising a chat room created for the virtual group wherein the purchasers discuss the lottery tickets with each other over the Internet.

5. (Amended) The system of claim 1 wherein the group information is changed by accessing the at least one server via the Internet.

6. (Amended) The system of claim 1 wherein the lottery information is changed by accessing the at least one server via the Internet.

7. The system of claim 1 wherein the chat room comprises an information menu for the purchasers to select for displaying information on one of the lottery tickets.

8. (Twice Amended) A method for purchasing lottery tickets over the Internet in a system including at least one server and at least one computer connected to the server via the Internet purchaser entering predefined information in the server via the computer, the at least one server storing group information, a virtual group of purchasers of lottery tickets, and lottery information on at least one lottery, the method comprising the steps of:

(a) electronically purchasing the lottery tickets according to the group information and the lottery information;

(b) communicating results of the lottery ticket purchasers to the purchasers using the group information; and

(c) repeating steps (a) and (b) according to the group information and the lottery information, unless any of the group information and the lottery information is changed.

9. The method of claim 8 wherein the group information includes one or more of the purchaser's telephone numbers, fax numbers, cellular telephone numbers, e-mail addresses and biographical information of the purchasers.

10. The method of claim 8 wherein the lottery information includes one or more of the lottery type, purchase volume, purchase interval, lottery number selection, tracking interval, payment method, distribution and notification method for the virtual group,

11. The method of claim 8 further comprising the step of creating a chat room for the virtual group where the purchasers discuss the lottery tickets with each other over the Internet.

12. The method of claim 11 further comprising the steps of:

(e) causing the at least one computer to be connected to the at least one server over the Internet;

(f) determining whether any of the purchasers is online over the Internet;

(g) providing instant messaging if any of the purchasers is online; and

(h) accessing the chat room.

13. The method of claim 11 further comprising the steps of:

(i) determining whether a change has been requested for the

group information;

(j) causing the group information to be changed, if a change has been requested in step (i);

(k) determining whether a change has been requested for the lottery information; and

(l) causing the lottery information to be changed, if a change has been requested in step (k).

14. The method of claim 12 further comprising the step of authenticating access in step (h).

15. The method of claim 12 further comprising the step of authenticating change in steps (i) and (k).

16. The method of claim 8 further comprising the steps of selecting one of the lottery tickets and displaying information corresponding to the selected lottery ticket.

17. The method of claim 8 wherein the step of communicating results communicates information on the purchases and information on whether any of the purchases resulted in a winning ticket.

18. The method of claim 8 wherein the step of communicating is by one of electronic mail or posting results on an Internet website.
